Professional Summary

Data and BI analyst with 8+ years building reporting, automation, and analytics tools end to end, from requirements and data modelling to Power BI dashboards, KPI reporting, process automation, and self-service tools. Skilled in SQL (IBM DB2, Google BigQuery), Python, Power BI, and Power Automate, with hands-on chatbot design and deployment (Microsoft Teams) and daily use of generative AI to build and debug faster. Completing a Master of Data Analytics in Ontario and seeking a Fall 2026 WIL co-op in data modelling, business intelligence, or operations analytics with a Canadian team.

Technical Skills:

Power BI (DAX, Power Query, dashboards) · Data modelling · SQL (IBM DB2, BigQuery, SQL Server) · KPI development · BI dashboards · Excel & Access / VBA Macros · Process automation · applied & generative AI (chatbot design, Power Virtual Agents) · User-interface requirements · Python for data tasks · data integrity & documentation

Education

University of Niagara Falls Canada (UNF) - Master of Data Analytics (Current GPA 3.8)
Niagara Falls, Ontario | In progress | Program finish March 2027

University of Lima - Bachelor's in Information Systems Engineering (GPA 3.7**)**
Lima, Peru | Completed July 2016

Professional Development / Certificates

Cibertec Technology Institute - Advanced Excel (48 hours)
Data Management Corp. Peru - Power BI & Dashboards (24 hours)
ESAN University - Executive Program in BI (24 hours)
Cambridge Innovation Center Peru - Negotiation Techniques (12 hours)
Google Cloud Skills Boost - Generative AI learning paths (Intro to Generative AI; Build and Modernize Applications with GenAI; Gemini for Google Cloud), hands-on labs, 2026.

EXPERIENCE

Sura Peru - AFP Integra

Analyst III in Collection Intelligence/Contribution Recovery **April 2023 - September 2025**

• Built and deployed a rule-based chatbot in Microsoft Teams (Power Virtual Agents + Power Automate) for employee process questions (won first place in the company's innovation contest).
• Owned the team's Power BI dashboards end-to-end (the reporting business users relied on for daily decisions) and an annual budget.
• Migrated my reporting extraction to Google BigQuery when Sura adopted GCP (2025), writing and optimizing BigQuery SQL for faster, more reliable queries on large datasets, using generative AI to accelerate complex query development.
• Lowered the late-payment rate from 27% to 24% by pairing the scoring model with targeted campaigns.
• Led the requirements, design, UAT, user-flow documentation, and vendor coordination for a customer self-service app, working with stakeholders and vendors from conception to delivery.
• Cut operating costs ~40% by using scoring and performance data to consolidate the redundant external providers I supervised (from a panel of 5).
• Designed a debt-scoring and segmentation data model (SQL, Excel/VBA/Access) and an automated portfolio-allocation process that assigned accounts to external collection providers.

Analyst II in Collection Intelligence/Contribution Recovery **April 2019 - March 2023**

• Automated debt-report generation with Excel VBA and Access macros, cutting it from ~30 minutes to ~2 minutes per report and enabling batch generation.
• Reduced manual processing ~45% across the team by building automations and standardized, parameter-driven reports (including self-service report tools for the legal team).
• Built a SQL → Microsoft Access → Excel data workflow integrating multiple source systems that fed the team's reports

and automations.
• Created multichannel collection campaigns (HTML email, SMS, and voice templates with personalized fields) and early Power BI dashboards for operational reporting.

Analyst I in Collection Intelligence/Contribution Recovery **December 2016 - March 2019**
• Supported administrative and judicial collections, gathering and reconciling data across departments using SQL (IBM DB2) and AS400.
• Built early automations and streamlined workflows that reduced repetitive manual work and set the foundation for later reporting tools.

CCR Cuore Research & Consulting – Peru **January 2016 - July 2016**
IT Intern
• Supported the Market Research Analytics team by producing reports and insights using QlikView and SQL Server.

Banco de Credito BCP - Peru **October 2014 - December 2015**
Post - Sale Operations Intern
• Supported the Customer Service Information & Analytics team by documenting processes and analyzing service workflows.

ADDITIONAL

Languages: Spanish (native) · English (C1, Duolingo) · German (intermediate)

Volunteering:

- **University of Niagara Falls Canada (UNF)**: Supported student events by assisting with check-in/registration, answering attendee questions, guiding students to the right place, and helping staff keep the event flow organized, including Santa Claus Parade, Fall Opportunity Fair, ISA International Education Week, New Student Orientation NSO (Winter) and Winter Festival.
- **SURA School (Christel House Mexico)**: Volunteer Tutor (2019): Provided English-language and homework support, adapting explanations to the student's pace and building confidence.

Community & Leadership:

- Certified Piano Teacher Suzuki Method (Book 1)
